## CRV Session Procedures Report (S/NF/SK)

	Control Number : 'G'	
	Date of Session : 14Nov86	
	Date of Report : 17Nov86	
	Session Number : CRV-06	
	Source Identifier: RV-003	

*minutes 029*

1. (S/NF/SK) Tasking: (See original tasking data, attached).
2. (S/NF/SK) Session: Source was provided the original encrypted coordinate for this site and allowed to perceive/describe it without monitor "steering" or additional cueing; no attempt was made, as in earlier sessions, to access each specific area of site (see tasking data) in turn.
3. (S/NF/SK) Summary: Source description of site was almost identical with that provided in earlier sessions, in fact source realized that he had worked this site previously. NOTE: Both RV-003 and RV-021 experienced AOL of "biowarfare" in conjunction with this operation, or at least in connection with part of the site.
4. (S/NF/SK) Feedback: In answer to source's query, he was informed that he had, indeed, worked this target previously and that problems were being experienced with it, probably because of its complexity and the number of specific targets it contains. Source and monitor both reached the conclusion that the best way to pursue this operation is to assign each target at the site an individual coordinate (thereby locking signal to a small area from the start at S1).
